Project Approval Letter

This letter confirms that **AgriFeed Net Ltd** has reviewed and approved the final-year project proposal titled **"AI-Assisted Farmer Decision Support System."**

The proposed system will use Artificial Intelligence and agricultural data to support farmers in making better decisions. It will analyze weather, soil, crop, and market information to provide recommendations on planting time, crop selection, fertilizer use, irrigation, pest and disease control, and market selling decisions.

AgriFeed Net Ltd recognizes that this system will help improve farm productivity, reduce losses, and promote sustainable and climate-smart agriculture. We give full permission for MANZI NGOGA Rodriguez to design and develop this system as part of their final-year project.

We look forward to the successful completion of this project and its contribution to improving farmer support and modern agriculture.
